Company Overview

Maisam Steel Mill (MSM) is certified to IEC/ISO 9001:2015, IEC/ISO 45001:2018, and the Afghanistan National Standards Authority (ANSA). Established in 2009, MSM is proud to be Afghanistan's first steel manufacturing factory.

MSM currently boasts a production capacity of 500+ metric tons per day, manufacturing a diverse range of high-quality steel products. Our core portfolio includes:

- Steel Rebar: Sizes from 8mm to 32mm.
- Steel Angles: Sizes from 20mm x 20mm to 75mm x 75mm.
- Steel T-Bars: Available in various standard sizes.

In line with our commitment to growth and innovation, MSM plans to soon introduce new structural products to the market.

Our commitment to national development extends beyond manufacturing. Since our inception, we have successfully completed partnerships such as a Public-Private Alliance with the USAID-funded ABADE project, the MCC19- Nela bagh China project, and many others. These initiatives have resulted in the employment of over 500 national and international employees and have introduced more standardized, high-quality steel products to the domestic market.

There is significant national demand for MSM products, which are distributed and sold across almost all provinces of Afghanistan, supporting the country's infrastructure and construction growth.

CEO's Message

To our valued partners, clients, and the people of Afghanistan,

It is with great pride that I introduce Maisam Steel Mill (MSM), a company born from a vision to build a stronger, more self-reliant Afghanistan. Since our establishment in 2009 as the nation's first steel manufacturer, we have been steadfast in our mission to fuel the nation's growth, one beam, one bar, and one project at a time.

Our journey began with a simple yet powerful belief: that Afghanistan deserves nothing less than the highest quality materials for its infrastructure and development. This commitment is reflected in our international certifications—IEC/ISO 9001:2015 for quality management and IEC/ISO 45001:2018 for occupational health and safety—as well as our compliance with the Afghan National Standards. These are not just certificates on a wall; they are our promise to you.

However, steel is more than just a product; it is about people. Our greatest accomplishment is not just in the tons we produce, but in the lives we impact. Through strategic partnerships, such as our successful collaborations with USAID's ABADE project and the MSCC China project, we have provided valuable skills and employment to over 500 talented Afghans and international experts, fostering a new generation of industrial professionals.

As you read through this profile, you will see more than a company. You will see a partner dedicated to precision, reliability, and the prosperity of Afghanistan. We are not just manufacturing steel; we are building the framework for our nation's future.

Thank you for your trust. We look forward to strengthening our partnership with you.

Sincerely,

SHAFIQ AHMAD KHWAJAZADA

Why Choose Us?

- High Quality: Afghanistan's first and only IEC/ISO-certified steel manufacturer.
- Wide Product Range: Rebars, angles, T-bars (and soon new products) for any project need.
- High Capacity: Reliable supply of 336+ metric tons per day each Mill.
- National Reach: Trusted and available across all Afghan provinces.
- Built for Afghanistan: Supporting growth, employment, and infrastructure since 2009.

Core Values

We value and practice integrity and ethics, mutual respect, Innovation and the drive for constant improvement. A strong work ethic and professionalism is practiced by all at MSM.

Quality

satisfaction

Innovation

Our Vision

Since there are a lot of unexploited mines in Afghanistan, strategically, our vision is to take part in extraction and exploitation of iron ore in the country. We aim to produce not only from scraps, but also from the rich mines of Afghanistan to create a value chain in the industry. By extracting and producing from these rich mines, we aim to step up in the international markets and grow our products to international markets, especially the neighboring countries, by providing high quality products and services. By expanding our operations and investments we aim to create more jobs, and boost up the Afghan economy

Our Mission

Our mission is to design, manufacture, and deliver products that meet the needs and expectations of each customer. As we are the first steel producer to introduce steel products in Afghanistan, we are committed to remain the leader in the steel manufacturing industry by providing high quality products, enhanced services, relationship and profitability. Thus, we intend to set standards of excellence with regards to steel manufacturing industry and environmental matters. With more than 15 years of experience in steel production, Alhamdulillah, we have successfully built a solid foundation and infrastructure for steel manufacturing industry.
